

MGT 321 Organization and Management 2

BE Computer VIII

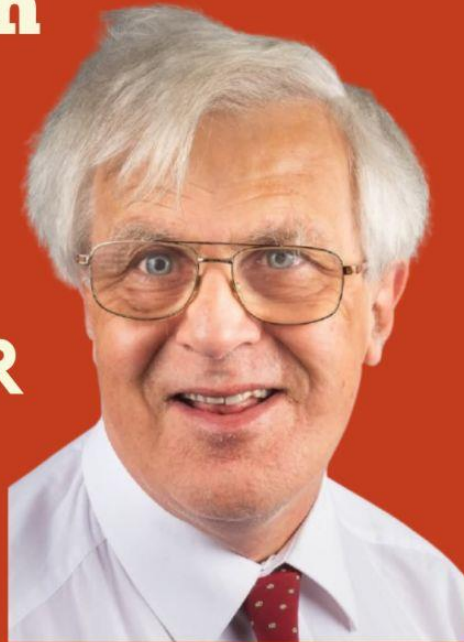

Meaning

**Individually, we
are one drop.
Together, we are
an ocean**

MENTOR

Andy

- **Organization:**
*Arranging
people and
resources to
achieve goals.*

Management

- *the process of coordinating resources to achieve specific goals efficiently and effectively.*

Why Organization and Management in Engineering?

- *Lead teams effectively*
- *Plan and manage complex projects*
- *Communicate and collaborate better*
- *Understand how organizations work*
- *Prepare for leadership roles and career growth*
- *It bridges **technical skills with managerial abilities**, which is essential in the real-world engineering field.*

Course Objectives

- Understand and analyze the professional work environment.
- Foster attitudinal and behavioral change.

Course Content

- Introduction 2
- Organization 4
- Motivation and Leadership 6
- Human Resource Management 6
- Introduction to industrial relations 6
- Human Behavior and conflict Management 7

1. Introduction (2 hrs)

- 1.1 Meaning and concept of management
- 1.2. Functions of management
- 1.3. Scope and application of management
- 1.4. Importance of management

2. Organization (4 hrs)

- 2.1. Meaning and concept of organization
- 2.2. Characteristics of organization
- 2.3. Principles of organization
- 2.4. Formal and informal organizations
- 2.5. Organization chart
- 2.6. Types of organization-line
 - 1. Line and staff
 - 2. Functional and matrix.
- 2.7. Authority and responsibility and their interrelationships

3. Motivation and Leadership (6 hrs)

3.1. Concept of motivation

3.2. Incentives

3.3. Theories of motivation: Need hierarchy, Dual Factoral, Expectancy and Achievement theories

3.4. Leadership styles: Participative management, Management by objectives, management by exception,

3. 5. Learning organizations

4. Human Resource Management (6 hrs)

4.1. Meaning and functions of human resource management

4.2. Recruitment

4.3. Job analysis, Job specification, Job description

4.4. Elements of compensation

4.5. Human resource development: Training (on the job and off the job)

4.6. Performance appraisal

5. Introduction to Industrial Relations (6 hrs)

5.1. Meaning of Industrial Relations

5.2. Trade union

1. Collective bargaining

- 2. Trade union movement in Nepal

5.3. Employee grievances

5.4. Employee Discipline

5.5. Employee health and safety

5.6. Compensation and its relation with industry

5.7. Challenges of industrial relations in Nepal

5.8. Methods of improving industrial relations in Nepal

6. Human Behavior and Conflict Management (7 hrs)

6.1. Concept of Human Behavior and Conflict Management

6.2. Types of Conflict Management

6.3. Conflict Management and its impact to the HRM

6.4. Modes of Conflict Management

1. Negotiation

2. Facilitation

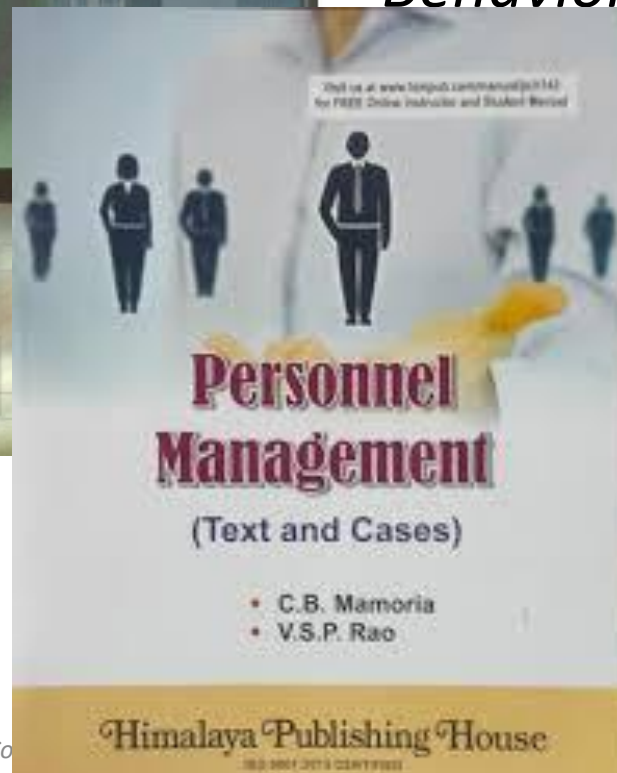

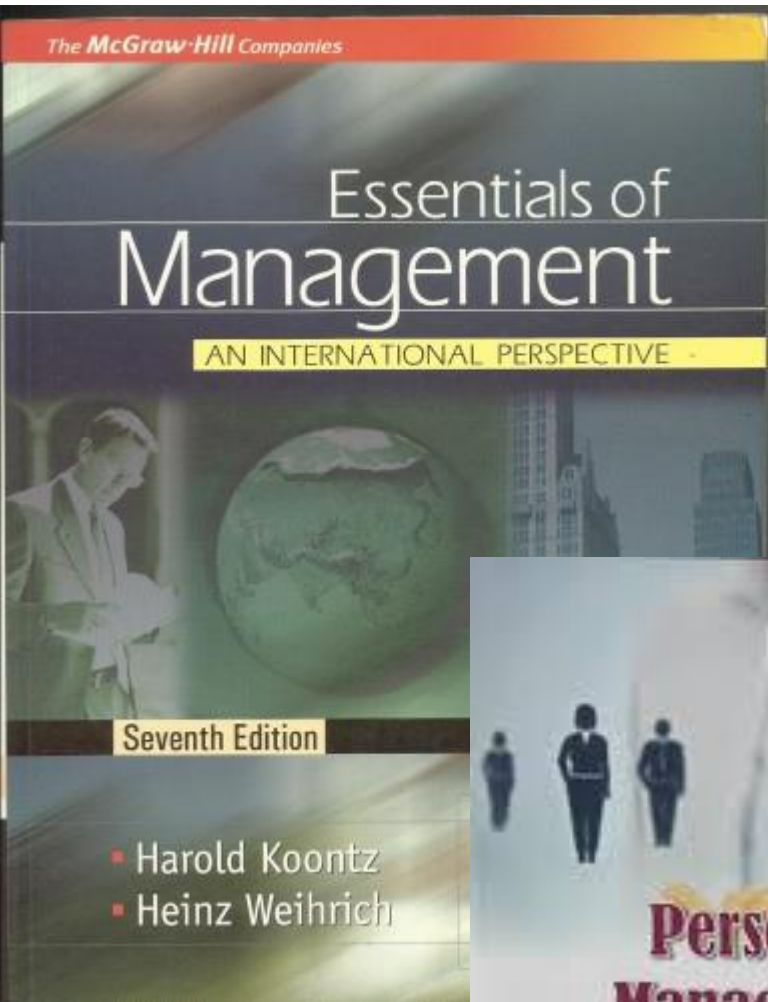

3. Mediation

4. Arbitration

5. Legal action

References

- 1. **Harold Koontz and Heinz Weihrich**, *Essentials of Management*

Unit 1

Introduction (2 hrs)

Course Outlook

1. Introduction (2 hrs)

- 1.1 Meaning and concept of management
- 1.2. Functions of management
- 1.3. Scope and application of management
- 1.4. Importance of management

Etymological Meaning of Management

- The word **management** has its roots in the Latin and French languages:
- **Origin:**
 - The term comes from the **Latin** word "**manus**," meaning "hand."
 - It evolved through the **Old French** word "**manegement**," which means "the act of handling or controlling."
- **Components:**
 - The prefix "**man-**" relates to the idea of handling or controlling something, akin to using one's hands.
 - The suffix "**-ment**" indicates the process or result of an action.

Meaning

- Skillfully guiding resources (people, money, etc.) to achieve common goals
- Management is the process of getting jobs done through and with other people by using the resources (human, financial, physical and information) optimally.

"management" can also refer to the group of individuals who hold the responsibility of managing an organization.

Definitions

- **Henry Mintzberg:**

- "Management is a practice where art, science, and craft meet."

- **Harold Koontz:**

- "Management is the process of designing and maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims."

- **Henri Fayol:**

- "To manage is to forecast, to plan, to organize, to command, to coordinate, and to control."

- **Peter Drucker:**

- "Management is doing things right; leadership is doing the right things."

Characteristics of Management

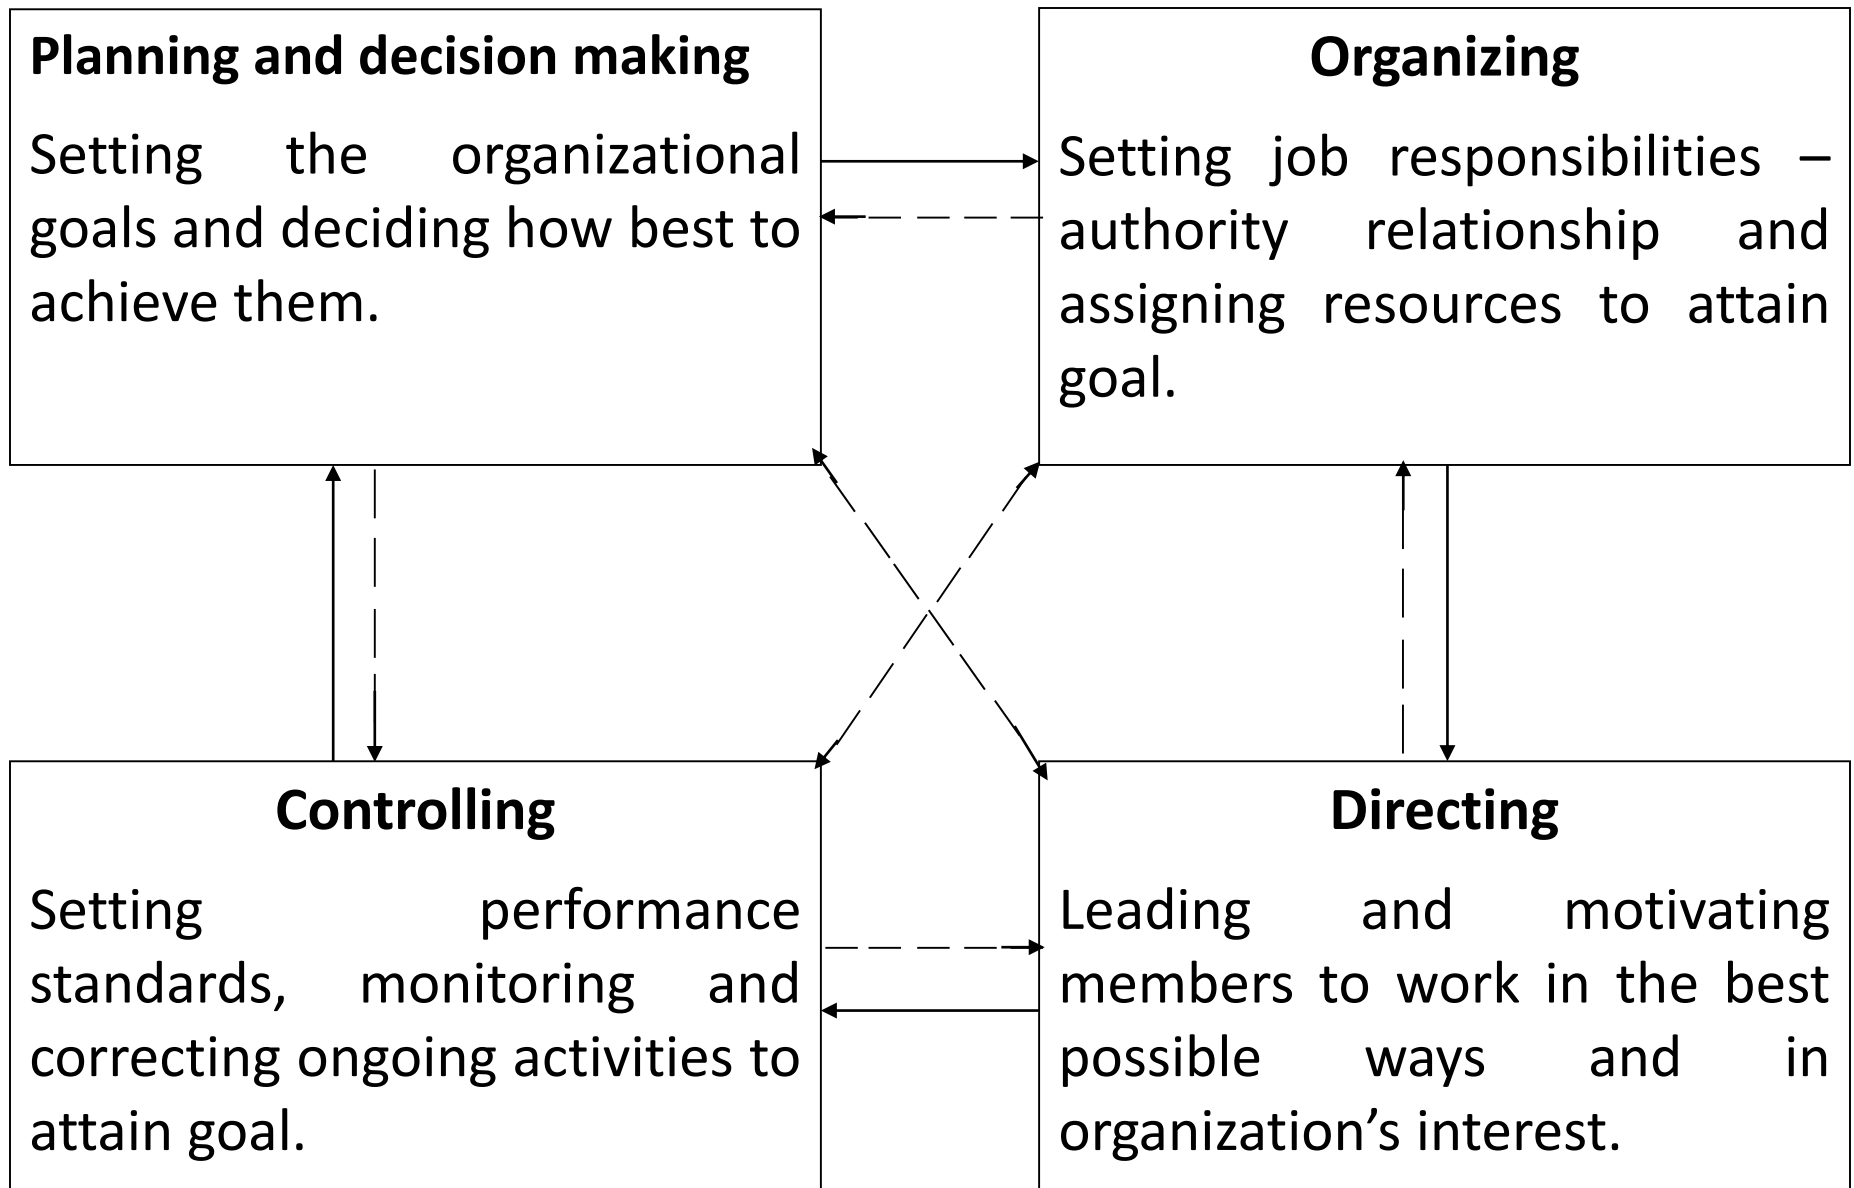

- Goals focused
- Pervasive(Broad) function
- Group activity
- Efficiency and effectiveness
- Works through and with other
- Situational process
- Multidisciplinary
- Environmental influence
- Intangible
- Both Art and Science

Concepts of Management

- **Classical Concept:** Focus on planning, organizing, commanding, coordinating, and controlling (Fayol's principles).
- **Behavioral Concept:** Emphasizes human relations and motivation.
- **Systems Concept:** Views organization as a system of interrelated parts.
- **Contingency Concept:** Management practices depend on situational variables.

Concept Name	Theory/Key Proponent(s)	Description
Classical Concept	Henri Fayol (Administrative Theory)	Focuses on universal management functions: planning, organizing, commanding, coordinating, and controlling. Emphasizes formal structure and efficiency.
Behavioral Concept	Elton Mayo (Human Relations Movement), Douglas McGregor (Theory X and Theory Y)	Emphasizes the importance of human behavior, motivation, leadership, and group dynamics in management. Focus on employee welfare and motivation.
Systems Concept	Ludwig von Bertalanffy (General Systems Theory)	Views the organization as an open system composed of interrelated and interdependent parts working together to achieve common goals.
Contingency Concept	Fred Fiedler, Paul Lawrence, Jay Lorsch	Proposes that there is no one best way to manage; management practices should vary according to situational factors and environmental variables.

Functions/Process of Management

Functions of Management

- **Planning & Decision Making**

- **Organizing & Staffing**

- **Directing** : Leadership, Motivation, Communication & Supervision

- **Controlling**

- Planning

- Organizing

- Leading

- Controlling

FUNCTIONS OF MANAGEMENT

Planning, Organizing, Staffing and More

CLIFTON.COM

Practical Examples:

- **Planning:** Estimating compute costs for a cloud-based AI model.
- **Organizing:** Structuring a team to handle front-end, back-end, and database tasks.
- **Leading:** Motivating a team during a crunch to meet a client's deadline.
- **Controlling:** Using monitoring tools like Prometheus to track system performance.

Functions of Management

- **Henri Fayol:** *Planning, Organizing, Commanding, Coordinating, Controlling.*
- **Peter Drucker:** *Setting Objectives, Organizing, Motivating, Measuring Performance.*
- **Mary Parker Follett:** *Coordination, Leadership, Conflict Resolution.*
- **Harold Koontz:** *Planning, Organizing, Staffing, Leading, Controlling.*
- **Henry Mintzberg:** *Interpersonal Roles, Informational Roles, Decisional Roles.*

Planning & decision making

- Planning is the process of deciding in advance about what to do, how to do it, when and where to do it, who is to do it, etc.
- Planning is the process of setting goals and choosing actions to achieve them.

Steps in the Planning Process

- 1. Define Objectives*
- 2. Assess the Current Situation*
- 3. Identify Alternatives*
- 4. Evaluate Alternatives*
- 5. Select the Best Alternative*
- 6. Develop an Action Plan*
- 7. Monitor and Adjust*
- 8. Evaluate Outcomes*

Organizing & Staffing

Organizing is the process of creating structure. It is a process of establishing working relationships among employees, jobs and units of organization to achieve goals.

- Identifying and defining the activities to perform to attain organizational goals.
- Grouping similar activities in to job.
- Defining authority to each department and units.
- Assigning job to department and units.
- Fixing authority to each job responsibilities.
- Establishing formal relationship in horizontal and vertical levels.

Directing

Directing is a management function regarding instructing, guiding, inspiring, communicating and supervising subordinates for effective and efficient performance towards organizational interest.

Directing consists of leadership, motivation, communication and supervision.

Leadership sets organizational goals and influences employee's behavior toward achieving predetermined goals.

It sets standard of performance and gives attention to the needs and expectations of followers.

Controlling

- Controlling is the process of correcting performance of individual, units, departments and whole organization to improve the overall organizational performance toward goal achievement.
- In simple words, controlling is a function for taking corrective action whenever and wherever required.
- Controlling includes four steps
- Establishing the standard for performance,
- Measuring actual performance,
- Finding and analyzing the differences between standard and
- Actual performance and initiating the correcting actions.

1.3 Scope and Application of Management

- **Scope of Management:**
 - **Operations Management:** Production and delivery of goods/services.
 - **Financial Management:** Planning and controlling financial resources.
 - **Human Resource Management:** Recruitment, training, and employee welfare.
 - **Marketing Management:** Market research, sales, and customer relations.
 - **Strategic Management:** Long-term planning and policy formulation.
 - **Information Management:** Managing data and IT resources.

Application of Management:

- **Business Organizations:**
 - Manufacturing, service, retail.
- **Government Agencies:**
 - Public administration and policy implementation.
- **Non-Profit Organizations:**
 - Charities, NGOs.
- **Healthcare:**
 - Hospitals and clinics.
- **Education:**
 - Schools and universities.
- **Sports and Entertainment:**
 - Team management and event planning.

Area	Management Role/Scope	Application Example
Project Management	Planning, organizing, controlling resources	Software/hardware development projects
Process Management	Standardizing and improving engineering processes	Agile, DevOps, ISO standards
Quality Assurance	Ensuring product and process quality	Testing, validation, compliance
Resource Management	Allocating people, tools, and budget	Team assignments, cloud resource allocation
Risk Management	Identifying and mitigating risks	Security, technical, financial risk plans
Measurement & Metrics	Data-driven monitoring and improvement	Code quality metrics, project KPIs
Office Automation	Streamlining administrative and engineering workflows	Database, ERP, project management software
Team Management	Leading and motivating technical teams	Team building, leadership in software teams

1.4 Importance of Management

- **Achieving Goals Efficiently:**

- *Management ensures resources are used optimally to meet organizational goals.*

- **Helps in Achieving Group Goals:**

- *Coordinates individual efforts towards a common objective.*

- **Increases Efficiency:**

- *Proper planning and organization reduce waste and redundancy.*

- **Creates a Dynamic Organization:**

- *Helps adapt to changing environments and market conditions.*

- **Facilitates Innovation and Change:**

- *Encourages new ideas and continuous improvement.*

- **Builds a Healthy Work Environment:**

- *Motivates employees and improves morale.*

- **Ensures Growth and Development:**

- *Strategic management leads to sustainable growth.*

Differentiate between Manager and Leader

Aspect	Manager	Leader
Focus	Task-oriented	People-oriented
Approach	Administers and controls	Inspires and motivates
Decision Making	Makes decisions based on data and processes	Makes decisions based on vision and values
Style	Authoritative, directive	Collaborative, inclusive
Goal Orientation	Achieves organizational goals	Develops team and individual potential
Communication	Tends to be formal and structured	Encourages open dialogue and feedback
Change Management	Manages change through established protocols	Embraces change and encourages innovation
Risk Tolerance	Generally risk-averse	More willing to take risks for growth
Timeframe	Short-term focus	Long-term vision
Relationships	Maintains professional distance	Builds strong personal connections
