

Register activity to manifest file

```
<activity android:name=".MainActivity">
    <intent-filter>
        <action android:name="android.intent.action.MAIN" />

        <category android:name="android.intent.category.LAUNCHER" />
    </intent-filter>
</activity>
```

Create BroadcastReceiver class

```
package np.com.westernit.alarmnetworking;

import android.content.BroadcastReceiver;
import android.content.Context;
import android.content.Intent;
import android.media.MediaPlayer;
import android.widget.Toast;

public class MyBroadcastReceiver extends BroadcastReceiver {
    MediaPlayer mp;
    @Override
    public void onReceive(Context context, Intent intent) {
        mp=MediaPlayer.create(context, R.raw.alarm);
        mp.start();
        Toast.makeText(context, "Alarm...", Toast.LENGTH_LONG).show();
    }
}
```

Create Activity class

```
package np.com.westernit.alarmnetworking;

import androidx.appcompat.app.AppCompatActivity;

import android.app.AlarmManager;
import android.app.PendingIntent;
import android.content.Intent;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.Toast;

public class MainActivity extends AppCompatActivity {

    Button start;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        start= findViewById(R.id.button);

        start.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                startAlert();
            }
        });
    }
}
```

```

    });
}

public void startAlert(){
    EditText text = findViewById(R.id.time);
    int i = Integer.parseInt(text.getText().toString());

    Intent intent = new Intent(this, MyBroadcastReceiver.class);
    PendingIntent pendingIntent = PendingIntent.getBroadcast(
        this, 234324243, intent, 0);

    AlarmManager alarmManager = (AlarmManager) getSystemService(ALARM_SERVICE);
    alarmManager.set(AlarmManager.RTC_WAKEUP, System.currentTimeMillis()
        + (i * 1000), pendingIntent);
    Toast.makeText(this, "Alarm set in " + i + "
seconds", Toast.LENGTH_LONG).show();
}
}

```

Networking

Add the following permission

```

<uses-permission android:name="android.permission.INTERNET" />
<uses-permission android:name="android.permission.ACCESS_NETWORK_STATE" />

```

Create activity as:

```

package np.com.westernit.alarmnetworking;

import android.content.Context;
import android.net.ConnectivityManager;
import android.net.NetworkInfo;
import android.os.AsyncTask;
import android.os.Bundle;
import android.util.Log;
import android.view.View;
import android.widget.Button;
import android.widget.TextView;
import android.widget.Toast;

import androidx.appcompat.app.AppCompatActivity;

import java.io.BufferedReader;
import java.io.InputStream;
import java.io.InputStreamReader;
import java.net.HttpURLConnection;
import java.net.URL;

public class ReadWriteActivity extends AppCompatActivity {
    private TextView tvWebPage;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_read_write);
        tvWebPage = findViewById(R.id.tvWebPage);
        final Button read = findViewById(R.id.button);
        read.setOnClickListener(new View.OnClickListener() {

```

```

@Override
public void onClick(View v) {

    if (isOnline(getApplicationContext())) {
        try {
            new ReadData().execute("http://sunilbist.com.np/");

        } catch (Exception e) {
            Log.d(TAG, "onCreate: " + e);
        }

    } else {
        Toast.makeText(getApplicationContext(), "No Internet Connection",
Toast.LENGTH_LONG).show();
    }
}

});

}

public boolean isOnline(Context context) {
    ConnectivityManager connectivityManager =
        (ConnectivityManager)
context.getSystemService(Context.CONNECTIVITY_SERVICE);
    boolean isConnected = false;
    if (connectivityManager != null) {
        NetworkInfo activeNetwork = connectivityManager.getActiveNetworkInfo();
        isConnected = (activeNetwork != null) &&
(activeNetwork.isConnectedOrConnecting());
    }
    return isConnected;
}

private String TAG = "MyApp";

class ReadData extends AsyncTask<String, String, String> {

    @Override
    protected void onPreExecute() {
        tvWebPage.setText("Starting...");
        super.onPreExecute();
    }

    @Override
    protected String doInBackground(String... urls) {
        StringBuffer bf = new StringBuffer();

        try {
            URL url = new URL(urls[0]);
            HttpURLConnection httpURLConnection = (HttpURLConnection)
url.openConnection();
            httpURLConnection.connect();
            InputStream inputStream = httpURLConnection.getInputStream();
            BufferedReader bufferedReader = new BufferedReader(new
InputStreamReader(inputStream));
            String line = "";
            while ((line = bufferedReader.readLine()) != null) {
                bf.append(line);
            }
            httpURLConnection.disconnect();
        } catch (Exception e) {
            Log.i("MyApp", e.toString());
        }
    }
}

```

```

        return bf.toString();
    }

    @Override
    protected void onPostExecute(String s) {
        tvWebPage.setText(s);
        super.onPostExecute(s);
    }
}

```

Design Layout as

```

<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    tools:context=".ReadWriteActivity">

    <Button
        android:id="@+id/button"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:text="Read" />

    <ScrollView
        android:layout_width="match_parent"
        android:layout_height="wrap_content">

        <TextView
            android:id="@+id/tvWebPage"
            android:layout_width="match_parent"
            android:layout_height="wrap_content" />

    </ScrollView>
</LinearLayout>

```
