

SharedPreferences Example

Design layout as:

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".SharedPreferencesActivity"
    android:orientation="vertical">
    <EditText
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:id="@+id/etMessage" />

    <TextView
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:id="@+id/tvMessage" />
    <Button
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Write Preferences"
        android:onClick="writePreferences"/>

    <Button
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Read Preferences"
        android:onClick="readPreferences"/>

</LinearLayout>
```

Create Activity as:

```
package np.com.westernit.androidapp;

import android.content.SharedPreferences;
import android.support.v7.app.AppCompatActivity;
import android.os.Bundle;
import android.util.Log;
import android.view.View;
import android.widget.EditText;
import android.widget.TextView;
import android.widget.Toast;

public class SharedPreferencesActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_shared_preferences);
    }

    public void readPreferences(View view){
        TextView tvMessage = findViewById(R.id.tvMessage);
        SharedPreferences sp = getSharedPreferences("my-pref", MODE_PRIVATE);
        tvMessage.setText(sp.getString("name", "Not Found"));
        Toast.makeText(getApplicationContext(), "Read Shared Pref: "+sp.getString("name", "Not Found"), Toast.LENGTH_LONG).show();
    }
}
```

```

    public void writePreferences(View view){
        EditText etMessage = findViewById(R.id.etMessage);
        SharedPreferences sp = getSharedPreferences("my-pref", MODE_PRIVATE);
        SharedPreferences.Editor ed = sp.edit();
        ed.putString("name", etMessage.getText().toString());
        ed.putBoolean("status", true);
        ed.commit();
        etMessage.setText("");
        Toast.makeText(getApplicationContext(), "SharedPreferences Set:
"+etMessage.getText().toString(), Toast.LENGTH_LONG).show();
    }
}

```

Set this activity as launcher:

```

<activity android:name=".SharedPreferencesActivity">
    <intent-filter>
        <action android:name="android.intent.action.MAIN" />
        <category android:name="android.intent.category.LAUNCHER" />
    </intent-filter>
</activity>

```

Writing and Reading from/to a file

Design layout as:

```

<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".FileReadWriteActivity"
    android:orientation="vertical">
    <EditText
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:id="@+id/etMessage" />

    <TextView
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:id="@+id/tvMessage" />

    <Button
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Write File"
        android:onClick="writeFile" />

    <Button
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Read File"
        android:onClick="readFile" />
</LinearLayout>

```

Design Activity as:

```
package np.com.westernit.androidapp;

import android.os.Bundle;
import android.support.v7.app.AppCompatActivity;
import android.util.Log;
import android.view.View;
import android.widget.EditText;
import android.widget.TextView;
import android.widget.Toast;

import java.io.DataInputStream;
import java.io.FileInputStream;
import java.io.OutputStream;

public class FileReadWriteActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_file_read_write);
    }

    public void writeFile(View view){
        EditText editMessage = findViewById(R.id.etMessage);
        write(editMessage.getText().toString());
    }

    public void readFile(View view){
        TextView textView = findViewById(R.id.tvMessage);
        textView.setText(read());
    }

    public void write(String str) {
        try {
            OutputStream outputStream = openFileOutput("myfile.txt", MODE_APPEND);
            outputStream.write(str.getBytes());
            outputStream.close();
            Toast.makeText(this, "The Data inserted is Successful",
Toast.LENGTH_LONG).show();
        } catch (Exception e) {
        }
    }

    public String read() {
        try {
            FileInputStream fileInputStream = openFileInput("myfile.txt");
            DataInputStream dataInputStream = new DataInputStream(fileInputStream);
            StringBuffer sb = new StringBuffer();
            int c;
            while ((c = dataInputStream.read()) != -1) {
                sb.append((char) c);
            }
            Toast.makeText(getApplicationContext(), "The data read from file is
success", Toast.LENGTH_LONG).show();
            return sb.toString();
        } catch (Exception e) {
            return null;
        }
    }
}
```
