

A PRESENTATION ON

Contemporary Issues in Engineering

Globalization and Cross Cultural Issues

- ▶ Need for understanding cross cultural values
- ▶ Knowing when to listen, when to ask for help, and when—finally—to speak
- ▶ Developing effective relationship with people from cultures substantially different from own.
- ▶ Individualism vs collectivism.
- ▶ Acceptance of power and authority.
- ▶ Materialism vs concern for others.
- ▶ Formality vs informality.

Public private partnership

- ▶ Funded and operated through a partnership of government and one or more private sector companies.
- ▶ Private party provides a public service or project
- ▶ Assumption substantial financial, technical and operational risk in the project
- ▶ Enable public sector to harness expertise and experience.

Safety, Risks and Benefit Analysis

Development and Environment

- ▶ Better understanding of how societies can pursue economic and community goals.
- ▶ Research, policy work, publication projects, curriculum development, conference and other activities.
- ▶ Globalization, food policy, energy and climate change and sustainable economic integration.
- ▶ Frontier thinking in sustainable development and human well-being.
- ▶ Ecological health and the correlation between social and economic wellbeing.

Conflict and Dispute Management

- ▶ Also known as Reconciliation.
- ▶ Method and process involved in facilitating the peaceful ending of conflict
